

Among manufacturing industries, the largest purchasers of machinery and equipment are the metalworking industries, including steelmaking, the automotive industry and the machinery industry itself. Other large user industries are food processing, packaging and air and water purification. Machinery and equipment are made in foundries, machine and welding shops and assembly plants.

UNI International have excellent shipping solutions for your boat or yacht. We have experience carriers who are cautious and courteous, and we have the right equipment for the job. Our trucks are late model, well-maintained vehicles.

We offer high quality boat transport, boat hauling and boat moving services for small or large motor and sail boats. Pick up, delivery and transport services anywhere globally.

We transport all types of boats, houseboats, cruisers and yachts for boat manufacturers, trailers, boat dealers, yacht brokerages, and private owners worldwide. Our specialty is transporting over-size vessels. We can handle any configuration as we are specialist with heavy equipment. We also transport runabouts, sailboats and watercraft. UNI International takes the hassles out of moving a boat. Our hauling, loading and transporting experience is the best in the industry.
