

We'll develop an integrated logistics solution that provides the timing, value and service you need. You'll get improved, performance, simplified communications and coordination, leveraged transportation pricing, and expanded shipment visibility.

With years of experience and excellent understanding in the transportation of heavy machinery and equipment, we offer competitive rates providing flexibility of services. Our strength stems from the team of professionals and our ease and effortless view to customized to every client individual and specific needs giving each one a personalized service. Our services includes Ocean Freight Forwarding, Air Freight Road/Inland Freight, Intermodal, Custom Clearance, Marine Insurance, Dismantle and Consolidation services, Heavy Lift Cargo and other value added global logistics services.

We work with the operation by offering you the greatest support in importing and exporting saving your both valuable time and money. "What is the status of my shipment?" is the question that is continuously asked by importers and exporters. For that reason, we have reinvested in our company to give our representatives access to the technology enabling them to track and clear your shipments as quickly as possible while in transit. Almost everything regarding shipping is done by us and there is nothing left that we cannot do as an efficient international shipping service provider.
